

M-Scan SA (Mass Spectrometry Consultants and Analysts) has a vacancy for a scientific collaborator

The M-Scan group, consisting of four laboratories in United Kingdom, Switzerland, Germany and the USA, was founded in 1979 to provide contract biopolymer analytical and consulting services utilising mass spectrometry. We are world leaders in the application of modern MS methods for the structural analysis of proteins, glycoproteins and carbohydrates. M-Scan SA, our laboratory in Geneva, is looking for a:

Senior mass spectroscopist

This position would be suitable for a graduate with some industrial experience, although full training will be provided for new graduates. Experience of any of the following areas would be an advantage: **LC-MS/MS, Protein Chemistry, Carbohydrate Chemistry, PK Studies, also experience of working in a GLP/GMP environment.**

This position involves working both individually on some projects and also within a team to solve a variety of analytical problems. The post requires an enthusiastic candidate willing to learn and master the skills involved in the analytical microchemistry and mass spectrometry. Following appropriate training it is envisaged that the candidate would be able to work on his or her own initiative and interact with the current and potential international clients. Knowledge of the English and French language would be an advantage. Liaison with and travel to the other laboratories within the M-Scan group is anticipated.

Applicant should write with a CV and the names of two referees (in confidence) to:

Dr. Luc-Alain Savoy

**M-Scan SA
Chemin des Aulx 12
1228 Plan-les-Ouates
Switzerland**
